

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

S&W Kennox Strategic Value Fund Institutional Net Income Shares [ISIN:GB00B3YDJ200] Institutional Net Accumulation Shares [ISIN: GB00B8Y8GR43]

The Authorised Corporate Director of the Fund is Smith & Williamson Fund Administration Limited, part of the Smith & Williamson group.

Objectives and investment policy

The Fund aims to preserve capital and provide long term capital growth through investing mainly in the shares of international companies (including UK). The Fund will focus on a small number of investments in companies which the investment manager believes offer good value relative to their long-term potential.

The Fund may also make other investments, including:

- bonds issued by governments and other organisations
- other investment funds
- cash, deposits and money market instruments
- warrants.

The Fund may use derivatives for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital.

Net Income Shares: Any income the Fund generates will be paid out to you.

Net Accumulation Shares: Any income the Fund generates will be reinvested.

You can buy and sell shares on any working day in London.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The Fund is in a higher category because the price of its investments have risen or fallen frequently and more dramatically than some other types of investment.
- The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to the future.
- The Fund may hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- Investments in emerging markets may involve greater risks due to political and economic instability and underdeveloped markets and systems. This means your money may be at greater risk of loss.
- The Fund is entitled to use derivative instruments for EPM. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund.
- The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- The price of natural resources may be subject to sudden, unexpected and substantial fluctuations. This may lead to significant declines in the values of any companies developing these resources in which the Fund invests and significantly impact investment performance.
- For full details please refer to Risk Factors in the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	1.16%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on last year's expenses and may vary from year to year. It excludes the cost of buying or selling assets for the Fund (unless these assets are shares of another fund).
- A dilution adjustment may be applied to adjust the price of shares, as it may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price.
- For further information about charges, please refer to relevant sections in the Fund's prospectus.
- The ongoing charges figure is as at 30/09/2016.
- The Fund's annual report for each financial year will include detail on the exact charges made.
