

PERFORMANCE COMMENTARY

As government intervention started to take effect, markets rebounded strongly in April, with the US leading the charge (up c. 11%, and posting its strongest month since 1987). This feels disconnected from the reality on the ground, where the economic impact is now being seen in rights issues, weaker results and rising unemployment.

The Fund rose 7.3%, with the majority of our holdings up. In particular, our gold miners (Newmont, Newcrest and Yamana) rose 29%, 28% and 68% respectively (in sterling terms). They feel particularly well placed for either an inflationary environment (which feels increasingly likely, if not imminent), or a prolonged period of uncertainty. We have trimmed Newmont slightly, as it reached a 10% holding size (the limit within a UCITS fund), and redeployed those proceeds into Newcrest and Yamana to maintain our exposure across the three names at 17.6%.

Returns from our energy majors were mixed during the month. Exxon and Equinor were strong (up 21% and 10%), whereas BP and Shell were weaker (down 9% and 5%). All our energy holdings have recovered well from extreme lows in mid-March (up 30% to 40% to end April, which includes the recent retreats after Shell cut its dividend). Medium term, we see this as an excellent opportunity – we hold a portfolio of the strongest energy operators, competing against indebted and narrow private producers on one side and brittle and unpredictable countries on the other (Iran and Venezuela, but even Russia and Saudi). Our four energy majors are a combined 14.5% Fund position, having added slightly in March.

The Fund remains well balanced to face the continued uncertainty posed by Covid-19. We have high-conviction exposures to defensive businesses (telecoms, healthcare, consumer staples and gold miners), whilst retaining un-demanding valuations across the portfolio (c. 11x our view of long term sustainable earnings).

INVESTMENT TEAM

Charles L. Heenan CFA & Geoff Legg

Charles and Geoff have worked together as an investment team since the inception of the portfolio in July 2007. Both focus exclusively on the management of the Fund. They are fully aligned with investors, each having 100% of their investment in equities in the Fund.

RELATIVE PERFORMANCE

We focus on long-term, absolute performance, not on short-term relative returns.

We do not track, nor are we constrained by, a benchmark.

Reference to the MSCI World, MSCI World Value and IA Global indices are for comparative purposes only.[‡]

We would expect that Fund weightings (geographic, sector and market cap) may vary considerably from those of the MSCI and IA indices.

Track Record Description & Methodology

[‡] The indices are not targets for the Company, nor is the Company constrained by the indices. The ACD has selected the MSCI World Value Index, the MSCI World Index and the IA Global sector as comparators against which shareholders may compare the performance of the Company as it believes these best reflect the Company's asset allocation. For more information please see the Fund's prospectus (available online and upon request).

* The portfolio was launched in July 2007 ("Inception") in Australia as the Contrarian Global Value Fund. The Kennox investment team ran that fund from launch until September 2008. The Kennox Strategic Value Fund was launched in April 2009, comprising 19 of the 20 positions that existed in the Australia fund. We have assumed a static portfolio for the interim period. Performance shown reflects total return of the Institutional Share class. Performance figures are generated from the accumulation shares since their launch on 29 April 2013. Prior to that performance figures are taken from an alternative share class, adjusted to reflect a 1.0% management fee throughout.

+ Sharpe Ratio is calculated as annualised return divided by the standard deviation of the excess return over the Libor 3m Bond yield.

++ Volatility is calculated as the standard deviation of the natural log returns multiplied by the square root of the periodicity of the returns.

Important Information

The information in this document does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, nor shall this document or any part of it or the fact of its distribution form the basis of or be relied on in connection with any contract. Interests in any investment funds managed by Kennox Asset Management will be offered and sold only pursuant to the prospectus relating to such funds.

The Kennox Strategic Value Fund ("Fund") should be considered a long-term investment. You should be aware that the Fund is permitted to invest in markets which are not as well developed or regulated as the UK. As such, investments in those markets may be less liquid, and may have less reliable custody arrangements. Therefore, they may be prone to above average volatility and carry more risk. Where investments are made in smaller companies, these companies' shares may be less liquid than larger companies and the price swings may therefore be greater. You should remember that the value of investments and the income derived therefrom may fall as well as rise and you may not get back the amount that you invest. Past performance is not a guide to future returns.

The Fund is denominated in £ sterling. You should be aware that if sterling appreciates or depreciates against the currencies in which investments are made, this could have an effect on the value of your investment. An investment in the Fund carries a degree of risk and retail investors should seek professional advice before investing in the Fund. Kennox has not taken any steps to ensure that the securities referred to in this document are suitable for any particular investor and no assurance can be given that the stated investment objectives will be achieved.
