

PERFORMANCE COMMENTARY

Stock market performance in August was again dominated by a few, correlated mega-caps, with Apple passing \$2tn in market capitalisation (only one year since breaching the \$1tn mark), and Tesla’s share price flying, apparently in reaction to a value-neutral share split. Extraordinary price movements in extraordinary times.

As investors focus on this narrow group of tech giants, value stocks continue to be ignored. The Fund was down 0.5% over the month. We continue to be optimistic, confident that the market will come to recognise the underlying value across our portfolio. The Fund’s largest positive contributor over the month was our energy holding Equinor, up 9%, as both its results and the announcement of the new CEO were well received by the market. The world still needs Equinor’s resources and the company is doing a good job in the transition to renewables. The shares trade at 10x our view of its long-term sustainable earnings (SE); it is a 4.4% position in the Fund. China Mobile’s share price also rose (up 6%), with 5G subscriber growth ahead of targets and results showing steady profitability - exceptional in these Covid times. A 4.7% position in the Fund, it trades at under 10x SE, delivering a 6% yield. These are very attractive valuations for a franchise that is integral to the world’s second largest economy and has an extraordinary ability to generate cash.

Having provided significant positive contribution towards the Fund’s performance since the outbreak of the Covid-19 pandemic, our goldminers retreated slightly during the month as the gold price took a breather after such strong moves. Covid and the governments’ and central banks’ reactions are having an enormous impact on the global economic backdrop and gold will enjoy tailwinds for the foreseeable future. Our three gold mining stocks trade at reasonable multiples of their SE, attractive considering the outlook for their industry.

INVESTMENT TEAM

Charles L. Heenan CFA & Geoff Legg

Charles and Geoff have worked together as an investment team since the inception of the portfolio in July 2007. Both focus exclusively on the management of the Fund. They are fully aligned with investors, each having 100% of their investment in equities in the Fund.

RELATIVE PERFORMANCE

We focus on long-term, absolute performance, not on short-term relative returns.

We do not track, nor are we constrained by, a benchmark.

Reference to the MSCI World, MSCI World Value and IA Global indices are for comparative purposes only.[‡]

We would expect that Fund weightings (geographic, sector and market cap) may vary considerably from those of the MSCI and IA indices.

Track Record Description & Methodology

[‡] The indices are not targets for the Company, nor is the Company constrained by the indices. The ACD has selected the MSCI World Value Index, the MSCI World Index and the IA Global sector as comparators against which shareholders may compare the performance of the Company as it believes these best reflect the Company's asset allocation. For more information please see the Fund's prospectus (available online and upon request).

* The portfolio was launched in July 2007 ("Inception") in Australia as the Contrarian Global Value Fund. The Kennox investment team ran that fund from launch until September 2008. The Kennox Strategic Value Fund was launched in April 2009, comprising 19 of the 20 positions that existed in the Australia fund. We have assumed a static portfolio for the interim period. Performance shown reflects total return of the Institutional Share class. Performance figures are generated from the accumulation shares since their launch on 29 April 2013. Prior to that performance figures are taken from an alternative share class, adjusted to reflect a 1.0% management fee throughout.

+ Sharpe Ratio is calculated as annualised return divided by the standard deviation of the excess return over the Libor 3m Bond yield.

++ Volatility is calculated as the standard deviation of the natural log returns multiplied by the square root of the periodicity of the returns.

3 SHARE CLASSES (Income & accumulation)	Investment Management Fee	Minimum Initial Investment	GBP (pence)	OCF	Sedol	ISIN
